Work Experience

Full Stack Developer
Federal University of Mato Grosso | August 2016 - Present

- Leading the project of integration between our in-house software to third-party software to deliver digital degree certificates to students.
- Backend role at the development team which integrated the student enrolment system to Alfresco CMIS Services.
- Developing, deploying, and maintaining diverse internal web applications for the academic community.
- Providing technical guidance to other developers about agile development practices.

Information Technician
Secretary of Labor and Social Assistance of Mato Grosso | 2013 - 2016

- Implemented an open source support ticket system called osTicket to track user's requests and provide quick responses.
- Supported the company by troubleshooting technical issues, resolving network incidents, and installing and configuring hardware and software.

Backend Developer
Federal University of Mato Grosso | 2012 - 2013

- Delivered the first version of the university's learning management system, which allowed online assessment and tracking of students' attendance by teachers.

Full Stack Developer
Inovabit | 2010 - 2012

- Developed, deployed, and maintained a variety of web applications for the company's clients.
